

Ferdinand Michael

YOUNG ARTIST

My Profile

My name is Ferdinand Michael Christian, commonly called Jamal. 22 years old and living in Bekasi. Pursuing education at ISBI Bandung with a major in fine arts. My hobbies include outdoor activities and listening to music. I like irregular line shapes and interplay between light and shadows.

About The Future

Since a young age, I have had a strong interest in art, especially visual arts. This interest then developed into an aspiration to become a professional artist. To realize that dream, I decided to continue formal education in the field of fine arts at an art college. My educational journey and experiences in the world of fine arts unfolded through a long and dynamic process. In that journey, I had the opportunity to build good relationships, engage in discussions, and learn intensively from senior artists. Through this interaction, I enriched my insights and understanding of the world of art.

My hope as an artist is to encourage the wider community to appreciate and enjoy art more. I also have the aspiration to become a great artist in the future, known for my memorable works, while making my parents proud of my achievements. In addition, I hope to create opportunities for my friends through collaboration and cooperation in the field of art.

The workshop program initiated by Art in Motion (AiM) is a very positive initiative, as it provides opportunities and paves the way for local young artists to showcase their existence in the world of art. I feel honored to be part of the team in this future project. With guidance from the Indonesian sculpture maestro, Mr. Nyoman Nuarta, I am committed to giving my best.

I would like to express my deepest gratitude to the Art in Motion team, the good relations between Indonesia and the Netherlands, and Mr. Nyoman Nuarta for the support and opportunities provided. May all the positive efforts that have been made continue to be smooth. I sincerely hope that the relationship and cooperation between the two countries can continue in the future.
